

# WinePak Glass Suppliers

## Partnership in Sustainability

Changyu Glass (CY) puts large focus on their sustainable efforts, with goals to provide their customers with more environmentally friendly and high-quality products. They have made significant investments to continuously make improvements to reach their low carbon emissions goals. In recent years, Changyu Glass has committed to promoting the development of low carbon and environmental protection through innovative technologies and strategies. These concepts run through all aspects of their products, always keeping their main goal of reducing carbon emissions in mind. Changyu's vision is to become the leading eco-friendly packaging supplier in China and have implemented a series of measures in order to do so. We are proud partners in sustainability with Changyu Glass!

Increasing the proportions of **cullet** used per manufacturing run.  
50% of cullet used in Antique Green glass bottles.

A ton of goods traveling a distance of 7,935 miles generates less CO2 emissions than a truck traveling 1,442 miles in the U.S.\*
