

WinePak Glass Suppliers

Partnership in Sustainability

Gallo Glass is California's largest single-site user of recycled glass, acquiring more than 20% of the total recycled glass in the state. Each year, Gallo Glass prevents the disposal of nearly 175,000 tons of glass by recycling it, sparing it from ending up in landfills. Up to 75% of recycled glass is in every Gallo Glass bottle. Gallo Glass's commitment extends to sourcing the majority of primary raw materials, such as sand, soda ash, limestone, and cullet, right here in the state of California. We are proud partners in sustainability with Gallo Glass!

GALLO RECYCLES AND REUSES 93% OF ITS PROCESS WATER DAILY

MEMBER OF THE

GLASS RECYCLING COALITION

Gallo Glass has significantly reduced their carbon footprint and air emissions through a number of recycling programs.

GLASS IS INFINITELY 100% RECYCLABLE

LIGHTWEIGHT BOTTLES

Gallo Glass has developed one of the nation's lightest wine bottles, further lessening carbon emissions

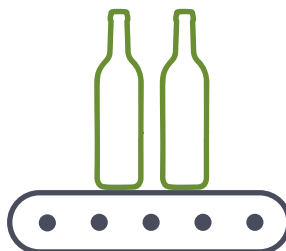

Gallo Glass has implemented strict environmental policies, where the company conducts their business in a manner that protects, preserves, and where & whenever feasible, enhances the environment.

The first container glass facility in the world to convert its furnaces to oxygen-fired natural gas.

GALLO GLASS PROCESSES 150,000 TONS OF RECYCLED GLASS EACH YEAR.

Gallo Glass utilizes state-of-the-art technology that allows them to produce up to **3 million bottles per day** at high efficiencies.
